THE BOARD OF TRADE RETURNS.

THE returns of our over-sea trade for the month of July are the most distinctly satisfactory that have been published for a long time past. The total imports amounted to £35,128,142, as compared with £31,835,553 in the corresponding month of last year, being an increase of £3,292,589, or 10·3 per cent. Our exports for the month were valued at £20,559,486, as compared with £18,398,536, an excess of £2,160,950, or 11·2 per cent. It is true that there was one working day more in the month of July this year than last, but even allowing for this, the expansion of trade is so marked and so general, particularly in exports, as to afford a decided confirmation of the indications of industrial revival which have been previously observed in other directions. When such a revival is in progress it has, of course, to make considerable headway before it makes any appreciable impression on the figures of our foreign trade, since the larger orders for materials and manufactures which are its first symptom must take time in the execution and despatch.

The present month's returns bring up the total imports for the current year to £238,801,680, which is still £4,005,238, or 1·6 per cent., below the total for the corresponding period last year. On the export side, however, the falling off hitherto shown this year has been turned into an increase, the total of £126,677,002 for the seven months being £1,394,991, or 1·1 per cent., in excess of the figures for the first seven months of 1894. The detailed particulars are given in the following statement:—

TOTAL IMPORTS.

	July, 1895.	Compared with July, 1894.	Seven Months, 1895.	Compared with 1894.

Articles of food and drink constitute the heaviest division of our imports, and among them wheat is, of course, the most important. The receipts of wheat and flour in July amounted to 10,763,760 cwts, as compared with 8,451,876 cwts in the same month last year. There is quite a proportionate increase in value, showing that prices have, at any rate, ceased to fall, if they are not actually higher than they were a year ago. The increase in quantity is equal to 27·3 per cent., and in value to 31·3 per cent. The increased quantity came mainly from Russia. There is a further decline in receipts of Indian corn from the United States, but this deficiency will probably be made good when the present crop, which is said to be an exceptionally heavy one, begins to come forward. Our imports of dead meat were valued at £2,218,205, or about £300,000 more than in July last year. Among dairy products, we got more butter and eggs from France, while imports of cheese from Canada and the United States have further fallen off. The cost of sugar is still low, as compared with last year, and although larger quantities have been imported, the value is less.

In spite of a heavy falling off in the deliveries of unwrought copper from the United States our imports of the metal last month were considerably larger than in July, 1894, owing to the increased quantities of regulus and precipitate. Raw metals of all kinds were landed in larger quantities, and as will be seen from the subjoined

comparison of quantities and values, prices have in several instances moved upwards in sympathy with the increased demand. As regards textiles, our imports of cotton show an increase for the month of 113,000 cwts, or 25·9 per cent. Although prices hardened somewhat a little time ago, they are still below last year's level, the increase of £65,000 in value being equal to only 7·5 per cent. This disproportion, however, is smaller than that shown in the figures for the seven months, where an increase of 14·4 per cent. in quantity was accompanied by a decrease of 9·4 per cent. in value The upward movement in the price of wool appears to have made greater strides, as the percentages of increase for the month are much the same in value as in quantity, while in the seven months an increase of 7·5 per cent. produces an increase of only 0·6 per cent. in value. Our imports of hides, tallow, timber, and other raw or partly-manufactured products all show increases for the month, in many cases of large proportions.

The principal feature in connection with our imports of manufactured articles is the increase in French silk and woollen goods, and among miscellaneous articles, nitrate of soda imports exhibit a small expansion, though the price appears to be low, as although the imports during the present year have exceeded those of the first seven months of 1894, the value is put at only £745,488, as compared with £848,279.

Dealing next with our export trade, it will have been observed from the summary tables that there is an increase under each of the divisions into which the Trade and Navigation Returns are classified. Our shipments of coal at length show an expansion as compared with the corresponding period last year, but whereas we exported in the month 1,595,511 tons more than last year, or 15 per cent., the increase in value was only £55,922, or 3·8 per cent. Nearly one-half the total increase in export values has accrued in the shipments of yarns and textile fabrics. As regards cotton goods, the trade of the month, while showing generally good results, presents no very marked features. Germany has greatly increased her demand for woollen and worsted yarn, while the principal feature in connection with our exports of woollen and worsted manufactures is the remarkable expansion of our trade with the United States. Our shipments of woollen goods to America are valued at £193,842 for the month, and £848,541 for the seven months, as compared with £44,888 and £171,696 respectively in the corresponding periods of last year. The growth in the worsted trade is even more remarkable, the figures being £455,436 and £2,816,066, as compared with £126,562 and £602,014. Shipments of metal goods show a fairly substantial improvement. The United States have taken more hardware and cutlery, and even pig-iron, though their own production is so large. The month's export of tin-plates to America was less than in the corresponding months, but the value for the seven months still slightly exceeds last year's total. More tin-plates have, however, gone to Russia and Australasia, and the Australian colonies have also taken increased quantities of bar and angle iron, but less railroad material. The latter, however, shows an increase for the month owing to the quantities dispatched to Brazil, India, and South Africa. Arms and ammunition, and carriages and cycles were exported in larger quantities, but the countries of destination are not specified. Among re-exports, the principal movement is again in colonial wool for the United States, but there is besides a substantial expansion in the re-shipments of tin.
